

## About Taiba Hospital

Taiba Hospital was established in 2002 to be the only private healthcare provider in Kuwait specialized in one-day surgeries. In 2006, Taiba acquired license to operate as a full-fledged hospital, becoming the first private hospital in Mubarak Al-Kabeer Governorate.

Taiba Hospital is proud to cater to the needs of its patients using state-of-the-art technologies and equipment, and according to international medical standards. Taiba proudly holds accreditation from the Joint Commission International (JCI) since 2007, and received accreditation for its Knee Replacement and Lumbar Decompression and Fixation programs in 2017 as the first in the Middle East.

Taiba is also the first private hospital in Kuwait to be accredited as a Baby Friendly Hospital by Kuwait Ministry of Health, World Health Organization and the UNICEF, for its efforts to promote breastfeeding and the wellbeing of pregnant women and newborn babies.
